Research articles

Urocystis cumminsii sp. nov., a smut fungus on *Themidaceae* from Arizona — Kyryll G. Savchenko, Sylena R. Harper, Lori M. Carris, Lisa A. Castlebury 591

Leucoagaricus brunneus sp. nov. from Khyber Pakhtunkhwa, Pakistan — Zia Ullah, Sana Jabeen, Muhammad Faisal, Habib Ahmad, Abdul Nasir Khalid 601

Dictyostelids from Jilin Province, China 3: new *Cavenderia* and *Dictyostelium* records — Pu Liu, Shunhang Zhang, Zhuang Li*, Yue Zou, Xueping Kang, Yu Li 613

Records of *Aureobasidium harposporum*, *Sarcophoma miribelii*, and *Stigmina dothideoides* from Turkey — Makbule Erdoğdu, Merve Ulukapi, Ali Ihsan Karayel, Zekiye Suludere 619

Bactrodesmium pulcherrimum sp. nov. from Ecuador — Fernando Espinoza, Daynet Sosa, Lizette Serrano, Adela Quevedo, Freddy Magdama, Marcos Vera, Simón Pérez-Martinez, Elaine Malosso, Rafael F. Castañeda-Ruiz 627

Dendrographium multiseptatum sp. nov. from China — Li-Guo Ma, Yue-Li Zhang, Bo Zhang, Kai Qi, Chang-Song Li, Jun-Shan Qi 633

Haematomma pluriseptatum sp. nov. from China — Congcong Miao, Rong Tang, Linlin Dong, Zhaojie Ren, Zuntian Zhao 637

New records of *Didymium inconspicuum, D. karstensii,* and *D. rugulosporum* from China — Chaofeng Yuan, Shu Li, Wan Wang, Shuwei Wei, Qi Wang, Yu Li 643

Rhomboidia wuliangshanensis gen. & sp. nov. from southwestern China
Tai-Min Xu, Xiang-Fu Liu, Yu-Hui Chen, Chang-Lin Zhao 649

Filsoniana lhasanensis sp. nov. from Tibet, China
Xue-Mei Wen, Hurnisa Shahidin, Abdulla Abbas 663

Sarcopodium flocculentum, the correct name for *S. macalpinei*
Shaun R. Pennycook & Paul M. Kirk) 677

Pteridicolous ascomycetes from a cloud forest in eastern Mexico
Rosario Medel-Ortiz, Yajaira Baeza, Francisco G. Lorea-Hernández 681

First sexual morph record of *Sarcopodium vanillae*
Napalai Chaiwan, Sajeewa S.N. Maharachchikumbura, Dhanushka N. Wanasinghe, Mingkwan Doilom, Ruvishika Jayawardena, Kevin D. Hyde 707

Notes on rust fungi in China 7. *Aecidium caulophylli* life cycle inferred from phylogenetic evidence and renamed as *Puccinia caulophylli* comb. nov.
Jing-Xin Ji, Zhuang Li, Yu Li, Makoto Kakishima 719

Exserticlava aquatica sp. nov., a microfungus from the Brazilian Amazon
Luana Teixeira do Carmo, Diogo Careli dos Santos, Carolina Ribeiro Silva, Sheila Miranda Leão Ferreira, Thamara Arão Feletti, Luís Fernando Pascholati Gusmão 731

Mycobiota (Funga) new to the Mycotaxon website

Ascomycota (lichenized and non-lichenized) on *Syagrus coronata* in the Caatinga biome: new and interesting records for Brazil and South America (summary)
Maiara A.L. dos Santos, Nilo G. S. Fortes, Tássio E. F. Silva, Nadja S. Vitória 737

Checklist of Bolivian *Agaricales.* 1: Species with dark and pink spore prints (summary)
E. Melgarejo-Estrada, M.E. Suárez, D. Rocabado, O. Maillard, B.E. Lechner 739

Nomenclatural novelties and typifications proposed in Mycotaxon 134(4)

Bactrodesmium pulcherrimum R.F. Castañeda, F. Espinoza & D. Sosa
[MB 830569], p. 629

Dendrographium multiseptatum L.G. Ma & J.S. Qi
[MB 832847], p. 634

Exserticlava aquatica L.T. Carmo, C.R. Silva, Careli, S.M. Leão, Feletti & Gusmão [MB 831391], p. 732

Filsoniana lhasanensis X.M. Wen, Shahidin & A. Abbas
[FN 570592], p. 669

Haematomma pluriseptatum R. Tang
[MB 830618], p. 638

Leucoagaricus brunneus Z. Ullah, Jabeen & Khalid
[MB 827985], p. 603

Puccinia caulophylli (Kom.) Jing X. Ji & Kakish.
[MB 830631; epitypified: MBT 386779], p. 726

Rhomboidia C.L. Zhao
[MB 833318], p.654

Rhomboidia wuliangshanensis C.L. Zhao
[MB 833320], p. 656

Urocystis cumminsii Savchenko, Carris & Castl.
[MB 830145], p. 595

Corrigenda

Volume 134-1

p.174, Acknowledgments

for: The author would like to thank Prof. Dr. Ertuğrul Sesli, Prof. Dr. İbrahim Türkekul, and Dr. Shaun Pennycook for their helpful comments and careful review.

read: The author would like to thank **Yüzüncü Yıl Üniversity, Coordination of Scientific Research Projects for financial support (2010-FED-B031 and FYL-2016-5213) and** Prof. Dr. Ertuğrul Sesli, Prof. Dr. İbrahim Türkekul, and Dr. Shaun Pennycook for their helpful comments and careful review.

From the Editor-in-Chief

Deadlines, Mycotaxon & Nomenclature—The most onerous task your esteemed *Editor-in-Chief* faces is bringing the year-end issue in 'on time.' A glance at our publication history suggests that during her tenure, she has failed miserably. Since 2004, she has met only three of her sixteen December deadlines: New Year's Eve 2004, Boxing Day 2007, 30 December 2009. Given this deplorable 37% success rate, it is no surprise that, once again, an October-December Mycotaxon will appear in January. (It could be worse: after adopting electronic submission and new software, we released the last 2005 volume on 11 May 2006!)

Reasons/excuses for delays are myriad: time-consuming nomenclatural revision and editorial repair of sloppily prepared submissions (on the misplaced notion that it is quicker for us to do authors' work for them), outside research commitments, severe health problems, uncontrollable press delays. Nonetheless, this year we were convinced that Mycotaxon 134(4) would be ready for delivery well before 2020.

What we did not anticipate was the small number of research papers submitted. With several authors not sending us their final papers after their 2019 nomenclatural review, we waited until December 27 before deciding to release the issue with only 140 pages (the smallest issue EVER since 1974) rather than waiting for final submissions that have yet to appear. Frustrating, because removal of required page charges produced a flood of 138 accessions during 2019.

What makes the year-end release date so important to Mycotaxon? With nomenclatural priority date-based, the date of publication is dictated by the actual release date and not what is displayed on the cover. That means that taxonomic names published in periodicals must cite both the actual date of publication and the 'nominal' date printed in the issue, e.g., following the order, *Haematomma pluriseptatum* R. Tang, Mycotaxon 134: 638 (2020) but indexed as "Miao, C, Tang R, Dong L, Ren Z, Zhao Z. 2020 ('2019'). *Haematomma pluriseptatum* sp. nov. from China. Mycotaxon 134: 637–641. https://doi.org/10.5248/134.637 " Much less confusing and infinitely more restful to have only ONE date to cite!

Mycotaxon 134(4) presents 15 papers by 81 authors (representing 15 countries) as revised by 34 expert reviewers and the editors.

The 2019 October–December Mycotaxon proposes one new genus (*Rhomboidia* from China) and eight new species representing *Bactrodesmium* from Ecuador; *Dendrographium, Filsoniana*, *Haematomma,* and *Rhomboidia* from China; *Exserticlava* from Brazil; *Leucoagaricus* from Pakistan; and *Urocystis* from the U.S.A. We also offer a new combination in *Puccinia* and epitypification for *Puccinia caulophylli.*

New species range extensions are reported for [ascomycetes] *Aureobasidium, Sarcophoma, Stigmina* in Turkey and new records and hosts of fern-associated ascos in eastern Mexico and [myxomycetes] *Cavenderia, Dictyostelium,* and *Didymium* in China.

Two papers on *Sarcopodium* [1] explain why *S. flocculentum* is the correct name for *S. macalpinei* and [2] discuss the first sexual morph recorded for *S. vanillae* in Thailand. Another paper treats the full life cycle for the rust *Puccinia* (≡ *Aecidium*) *caulophylli*.

Our small year-end issue closes with the announcements of two mycobiota [recently posted on www.mycotaxon.com] covering [1] new records of ascomycetes on *Syagrus coronata* in Brazil's Caatinga biome and [2] dark- and pink-spored agarics in Bolivia.

Wishing us all health, happiness, illumination, and peace in 2020,

Lorelei L. Norvell (*Editor-in-Chief*)
8 January 2020

publication date for volume one hundred thirty-four (3)

Mycotaxon for July–September 2019 (i–xiv + 423–590)
was issued on October 2, 2019

2020 Mycotaxon submission procedure

Prospective Mycotaxon authors should download the Mycotaxon 2020 guide, review & submission forms, and Mycotaxon sample manuscript by clicking the 'file download page' link on our Instructions to Authors page before preparing their manuscript. This page briefly summarizes our '4-step' submission process.

1—Peer review: Authors first contact peer reviewers (two for journal papers; three for mycobiota/fungae) before sending them formatted text & illustration files and the appropriate 2020 Mycotaxon journal or mycota reviewer comment form. Experts return revisions & comments to both the *Editor-in-Chief* <editor@mycotaxon.com> and authors. All co-authors must correct and *proof-read* their files before submitting them to the *Nomenclature Editor*.

2—Nomenclatural review: Authors email all **error-free** text & illustration files to the *Nomenclature Editor* <PennycookS@LandcareResearch.co.nz>. Place **first author surname** + **genus** + 'Mycotaxon' on the subject line, and (required) attach a completed submission form. The Nomenclature Editor will (i) immediately assign the accession number and (ii) after a few weeks return his notes and suggested revisions to the author(s) and *Editor-in-Chief*.

3—Final submission: All coauthors thoroughly revise and proof-read files to prepare error-free text and images ready for immediate publication. Poorly formatted copy will be rejected or returned for revision. E-mail the final manuscript to the *Editor-in-Chief* <editor@mycotaxon.com>, adding the **accession number** to the message and **all** files, which include a **(i)** revised 2020 submission form, all **(ii)** text files and **(iii)** jpg images, and **(iv)** FN, IF, or MB identifier verifications for each new name or typification. The *Editor-in-Chief* acknowledges submissions within two weeks of final submission but requests authors to wait at least 14 days before sending a follow-up query (without attachments).

4—Final editorial review & publication: The *Editor-in-Chief* conducts a final grammatical and scientific review and returns her editorial revisions to all expert reviewers and coauthors for final author approval. Author-approved files are placed in the publication queue.

The PDF proof and bibliographic & nomenclatural index entries are sent to all coauthors for final inspection. After PDF processing, the *Editor-in-Chief* corrects only PDF editorial/conversion and index entry errors; corrections of all other errors are listed in the Errata of a subsequent issue for no charge. Authors will pay fees for mycobiota uploads, optional open access, and correction of major author errors to the *Business Manager* <subscriptions@mycotaxon.com> at this time.

Mycotaxon ltd— www.mycotaxon.com

The Mycotaxon *Webmaster* <mycotaxon@gmail.com> posts announcements, subscription & publication information, and author forms & templates on the official Mycotaxon site. Our server also hosts the mycobiota web-page for free download of Fungae (regional annotated species lists).

Mycotaxon online— www.ingentaconnect.com/content/mtax/mt

The Mycotaxon journal publishes four quarterly issues per year. Both open access and subscription articles are offered.
